—OUR NEW—
TOMATO
 FOR 1900.
LIVINGSTON'S MAGNUS.

Mr. LIVINGSTON WRITES:

This very distinct and most promising new variety, of the color of Beauty and Acme, is the latest addition by Livingston to the Tomato family. It is thicker, heavier, and more solid than either of the above, making it easily the most handsome sort in cultivation.

It is unsurpassed in quality, and in the production of fine large fruits. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market.

The form is perfect, uniform, large and attractive. Flesh is very firm. It is a robust grower, with short joints; setting its fruit clusters closer together than most varieties, and is therefore a heavy cropper. The fruits are very deep from stem to blossom end, many of them being almost globe shaped. It ripens evenly, does not crack about the stem, and the flavor is most desirable.

We have tested it for several years for staking up in the open field, as well as for forcing in greenhouses; and we believe it to be entirely unequaled for such purposes. We offer it in the expectation that it will add to our reputation as introducers of New Tomatoes.

RETAIL PRICES: Per Pkt. 20c. 3 Pkts., for 50c. 7 Pkts., for \$1.00.
